PICO TECHNOLOGY RELEASES MOTORCYCLE DIAGNOSTICS KIT

Pico Technology, worldwide leaders in the design and manufacture of PC Oscilloscopes, have just released the Pico Motorcycle Diagnostics Kit.

With the launch of the Motorcycle Diagnostics Kit, Pico Technology have provided a valuable tool for the motorcycle market. All motorcycles require specifically designed tools to perform accurate diagnostics to find and fix a problem. As engine management systems advance and the emphasis on effective diagnostics grows, it is essential to have the right tools.

The Pico Motorcycle Diagnostics Kit is based on Pico's multi-award-winning automotive software. The automotive software is known for its wide range of preset tests and help topics, and its support for advanced diagnostic checks. The Motorcycle Diagnostics Kit allows you to test every fuel injection and engine management component from crankshaft and camshaft sensors to ignition systems.

Dave Hewson, Business Development Manager, says "We developed the Motorcycle kit to meet a requirement in the bike market. We understand how important it is for motorcycle repair shops and specialists to have a bike-specific diagnostic tool to support them, and the Motorcycle Diagnostics Kit does exactly that."

The Motorcycle Diagnostics Kit is easy to use, holds a library of standard tests and has a built-in reference library for motorbike diagnostics. Pico also provide full technical support and free software upgrades for the lifetime of the product.

The Motorcycle Diagnostics Kit is available immediately direct from Pico Technology or one of its authorised distributors, at £825 + VAT. Read further information on the Pico Technology website at www.picotech.com, or request details by calling +44 (0) 1480 396 395.

The Motorcycle Diagnostics Kit

About Pico Technology

Established in 1991, Pico Technology is a worldwide leader in the design, development and manufacture of high-performance PC Oscilloscopes. Pico Technology has used this success to produce the multi-award winning Automotive Diagnostics Kit. The kit is recognised as a leading diagnostic tool by vehicle manufacturers, the aftermarket and the commercial vehicle market. Pico's customer portfolio includes Aston Martin, Mazda, Iveco, Volvo, LDV Trucks and others.

Pico Technology prides itself on offering innovative, high-quality and affordable diagnostic solutions, designed and built under the ISO9001:2000 quality system. The company supports a network of distributors in over 60 countries worldwide who are helping to build and maintain its enviable reputation in the industry.
